```
#before using ggplot you need to load it up with library  
library(ggplot2)  
  
#ggplot has data + aes + geoms  
#geom_line is a trendline where geom_line treats it as consecutive data  
ggplot(data=cars)+ aes(x=speed, y=dist) + geom_point() + geom_smooth()
```

```
## 'geom_smooth()' using method = 'loess' and formula 'y ~ x'
```

```
#change to a linear model and save as p to call it forward when needed  
p <- ggplot(data=cars)+ aes(x=speed, y=dist) + geom_point() + geom_smooth(method="lm", se=FALSE)  
p + labs(title="Speed and Stopping Distance of Cars", x= "Speed (MPH)", y= "Distance (ft)", subtitle =
```

```
## 'geom_smooth()' using formula 'y ~ x'
```

Speed and Stopping Distance of Cars

relationship between speed and distance required for stopping

Dataset: cars

```
#base graphics is shorter: plot (cars)
## Warning: It is deprecated to specify `guide = FALSE` to remove a guide. Please
## use `guide = "none"` instead.
# to change size of points use size= parameter in aes
# to change color point use color=
# to change transparency use alpha=
```
